

Technical Specifications

Typical Connection Diagram

The SSR driver output is allocated to SP1 and wired to switch the load (heater) using an SSR.

- F1 Fuse:** Time lag type to IEC127. CSA/UL rating 1A 250Vac
- F2 Fuse:** High Rupture Capacity (HRC) suitable for maximum rated load current
- S1 Switch:** IEC/CSA/UL approved disconnecting device

Model 9300 / 9400
(48x48mm) 1/16 DIN

Model 3300
(48x24mm) 1/32 DIN

Ordering information codes 3300, 9300 & 9400

		Code
Model	48 x 24 mm	33
	48 x 48 mm	93
	48 x 48 mm dual display	94
Outputs Reversible	2A SSd / relay	00
	2A relay / 1A relay	11
	SSd / SSd	22
Unused		00
Comms	None fitted	0
	RS232 fitted	2
	RS485 fitted	4
Supply	100-240V AC	0
	12-24V AC/DC	3
Custom code Please refer to CAL for details	Standard code	0

Ordering example 1

Model 3300 48x24mm, SSd/relay, RS485, 12-24V

33 00 00 4 3 0

Ordering example 2

Model 9400 48x48mm dual display, relay/relay, RS232, 100-240 VAC

94 11 00 2 0 0

Codes for additional software and hardware

The CAL
range of
Temperature
Controllers

The range of Autotuning P.I.D. Temperature Controllers with RS232/485 Communications and Charting & Logging Software

CAL the pioneer of temperature control

CAL is a dynamic modern company and was the first to develop the 48x48mm (1/16THDIN) analogue controller in 1976, the first digital controller in 1986, and the first 24x48mm (1/32NDDIN) digital controller in 1992. CAL prides itself on technical competence, customer support and long-term supply of its range of controllers.

Model 9400
48 x 48 mm
(1/16TH DIN)

Model 9300
48 x 48 mm
(1/16TH DIN)

Model 3300
48 x 24 mm
(1/32ND DIN)

CAL's temperature controllers

These controllers are designed for ease of use, low-cost and reliability in demanding applications. They are already widely used in many industrial applications such as plastics, packaging, drying, ovens & furnaces and laboratory & scientific equipment. CAL's auto-tune makes P.I.D. control simple, just a few button presses will start the controller's self-tune which automatically selects the optimum P.I.D. values. Also CAL's unique dAC function is designed to minimise the overshoot problem associated with conventional P.I.D. control.

Functionality

- Easy-to-use Auto-tune program
- Simple menu-driven programming
- Full P.I.D. operation
- Single ramp/soak (dwell) program
- Heat-cool operation
- IP66 protection
- CE compliant

3-YEAR WARRANTY

Inputs and Outputs

- Thermocouple, PT100 (RTD) & mV
- Two outputs, SSR driver or Relay
- 5-alarm modes, full scale, deviation & band
- RS232 or RS485 (retrofitable)
- MODBUS RTU protocol

CALgrafix Process Monitoring and Configuration Software

CALgrafix is cost-effective process monitoring and controller configuration software that provides added value to using CAL's range of temperature and process controllers.

Example of networked controller configuration into CALgrafix

Functions

- Data-logger with archiving process data
- Chart-recorder for on-screen viewing of trends
- Virtual instrument display
- On-screen alarm displays with audible notification
- A unique drag'n'drop feature for programming 9500P profiles
- 'Cloning' of instrument settings
- Saving of applications for multiple controller set-ups
- Configuration/programming tool for controllers
- OPC client/server architecture

Ideal for:

Recording process data for manufacturing reporting, quality control, health & safety purposes, or OEM system development

Applications:

Food industry, Dairy industry, Carbon fibre, Glass, Rubber & Plastics manufacturing, Ovens, Furnaces, Kilns, Autoclaves, Environmental cabinets, Plastics machines, Laboratory and Scientific equipment, Bottling and beverage production and many other process industries.

Please ask for the applications guide for installing communicating controllers. CAL's technical manuals are available in French, German, Spanish, Swedish, Italian and English, both in printed and Acrobat .pdf formats.
